Jackson, Chief; Shipping and Foreign Aid Adviser, Milton Kaufman; Trade Information and Publications, Lala B. Pipkin.

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

SUGGESTED BRIEF CITATION

U. S. Bureau of the Census United States Import Statistics, Report FT 110, August 1963. Washington, D.C. 20233. November 1963.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington, D.C. 20402 and Department of Commerce Field Offices. Price 40 cents (single copy). Subscription price: $4; $1.25 additional for foreign mailing.

ANNOUNCEMENTS AND SPECIAL NOTICES

AVAILABILITY OF 1962 ANNUAL IMPORT STATISTICS PRESENTED IN TERMS OF THE THREE-DIGIT SITC COMMODITY GROUPS

In the August 1962 issue of Report Nos. FT 110 and FT 120, United States Imports of Merchandise for Consumption, Commodity by Country of Origin and Country of Origin by Subgroup, it was announced that a report would be issued showing 1962 annual data in the following arrangements:

1. Three-digit SITC commodity group by country of origin
2. Country of Origin by three-digit SITC commodity group

Sales copies of this report are available at the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, at 65 cents per copy. Present subscribers to report FT 110 and/or FT 120 will be furnished with a copy of this report, free of charge, upon request, to the Bureau of the Census, Washington, D.C. 20233.

SPECIAL REPORTS ARRANGED FOR ON A COST TO SUBSCRIBER BASIS

Special reports contracted for on a cost basis are listed in current publications so that all users of foreign trade statistics may be informed of the type of reports being prepared and the cost involved. These special reports cover foreign trade data in greater detail or in different arrangement than that available in the regularly published statistics, or supply at an early date information which will be published later. The entire cost of the special work required to compile or duplicate the information from the basic data available in the Bureau is charged to the subscriber.

The reports listed below are those which have been initiated since the last published list, covering statistics related to the data shown in this report. Special reports covering statistics related to other types of foreign trade data are listed in the current foreign trade reports covering such data. Reports previously contracted for are listed in earlier issues of this report, or in issues of the Foreign Trade Statistics Notes (published through the August 1960 issue and now discontinued.) Additional subscribers may purchase any special reports listed in any issue. The maximum payment required in each case will be at the rate shown in the list. Unless otherwise indicated, the prices listed cover subscriptions through the end of the calendar year. Where the period covered is less than a full calendar year, the actual period covered is indicated. When more than one user subscribes to one of these reports at the beginning of a calendar year, the cost is pro-rated among all subscribers. If a new subscriber requests the report during the calendar year, the cost to him in most cases is the same as the cost to each original subscriber.

Cost-sharing arrangements with the original subscribers are sometimes suggested in such cases when the report is a costly one. Information furnished on a cost basis usually will not be publicly released by the Bureau without charge or at a reduced rate until after six months, but exceptions are made in the case of data which the Bureau regards as of general interest.

Subscribers who are interested in information which is not obtainable from the regularly published foreign trade statistics reports, and not listed as a special report, may inquire as to the possibility of obtaining the desired information and request a cost estimate for initiating a new special report. The Bureau's policy with regard to services furnished at cost is described more fully in an article entitled "Policy in Regard to Release of Foreign Trade and Shipping Statistics Reports Prepared for Private Organizations on a Cost Basis" in the November 1962 issue of this report. Reprints describing these policies are available upon request to the Foreign Trade Division, Bureau of the Census, Washington, D.C. 20233. Inquiries regarding the possibility of obtaining unpublished data, or requests for copies of existing special reports, should also be addressed to that Division.

NOTE: The price per subscriber for special import reports for 1963 covers the cost for preparing the reports in terms of the commodity classifications provided in Schedule A, Statistical Classification of Commodities Imported into the United States. Effective September 1, 1963, the date the Tariff Classification Act of 1962 became effective, the import special reports are in terms of the Tariff Schedules of the United States Annotated (TSUSA).

In so far as it is possible, the commodity coverage of the statistics presented in the special reports, whether identified in terms of Schedule A classification or TSUSA classification, will be maintained. However, the change in classification structure from Schedule A to TSUSA may affect the reports and/or their cost as follows:

1. *Decrease or increase the cost for preparing a special report. In this case the recipient(s) will be notified of any necessary adjustment in cost.*

2. *Make available separately in the regularly released statistics the data presently available only in a special report. In this case the special report will no longer be necessary and the subscriber(s) will be refunded the unexpended balance of the original subscription price.*

SPECIAL REPORTS ARRANGED FOR ON A COST TO SUBSCRIBER BASIS--Continued

3. *Consolidate commodity information to such an extent that the desired detail is no longer available in separate classifications or identifiable on the import entries (the basic source of the statistics). In this case the subscriber(s) will be notified of the change and appropriate adjustment in the report and/or cost may be made where possible or where not possible the special report would be discontinued and the subscriber(s) would be refunded the unexpended portion of the original subscription price.*

SPECIAL MONTHLY REPORTS FOR 1963

FT 4020 United States Imports of Refined Natural Camphor and Synthetic Camphor (Schedule A Commodity Numbers 8259 000 and 8260 000) for Consumption from Countries with Values Under $10,000, Commodity by Country of Origin. *Price per year per subscriber $110.*

REPORTS FOR SPECIFIED PERIODS

United States Imports of Merchandise for Consumption and General Imports of Merchandise from Yugoslavia by Commodity. (Photocopies of Extracts from Machine Tabulation Table IA 236.) Calendar Year 1962. *Price per subscriber $60.*

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments into the United States from Puerto Rico and from the United States territories and possessions and shipments between the territories and possessions and between Puerto Rico and the territories and possessions are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value, such as personal and household effects.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouses), merchandise withdrawn from bonded storage warehouse for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouse.

Monthly Coverage

It is the objective of the compiling procedures, insofar as practical, to include shipments in the imports for consumption statistics for the month of import which, in general, is based on the date of filing of the consumption entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the month immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouse, bonded manufacturing warehouse, and bonded smelting and refining warehouse immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. Effective with statistics for January 1962, information is being compiled on United States general imports of merchandise by air. These data are published in Reports FT 380, FT 390 and FT 986. A more complete description of the coverage and presentation of the various types of statistics mentioned above will be found in the introductions to the specified reports.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry and warehouse withdrawal forms which importers are required to file with Collectors of Customs. Effective January 1, 1962, statistical factors of country of origin, net quantity, value, and commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries.[2] This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements. Information on warehouse withdrawals, which account for approximately 10 percent of the total value of imports for consumption, while not subject to the examiner verification procedure directly, should be improved indirectly (due to "education" of importers/brokers) by the verification of the warehouse entries to which they correspond.

VALUATION

The dollar value shown in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, ocean freight and marine insurance.

COMMODITY INFORMATION

Commodity Classification

Import commodity information is compiled in accordance with the classifications established in Schedule A, Statistical Classification of Commodities Imported into the United States. Effective with the statistics for January 1963, the Schedule A commodity information is arranged in terms of the Standard International Trade Classification, Revised, i.e., SITC section by SITC group by Schedule A commodity number by country of origin. The table beginning on page 5 of this report shows the SITC

[1] For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

[2] For information on the effects of examiner verification, see the article entitled "Level of Accuracy in Import Statistics" in the October 1961 issue of this report.

section and group codes and their descriptions, along with import value totals for these classifications. This table replaces the table containing commodity group and subgroup information which appeared in previous issues of this report. To assist users of the statistics in locating the data for individual Schedule A commodities, the January 1963 issue of this report contains lists showing the correlation between the SITC and Schedule A classes in the following arrangements: (a) in Schedule A commodity number order showing the SITC group (3 digit) code for each Schedule A number and (b) in the order of the SITC group codes showing the Schedule A commodity numbers included in the SITC groups. It should be noted that in relating the Schedule A classifications to the Standard International Trade Classification there were instances where, because of differences in these two classification systems, it was necessary to assign some Schedule A commodity numbers to SITC groups on the basis of judgment. In some cases a Schedule A commodity number includes items which should be classified in two or more SITC codes. In such cases the assignment of the SITC group code was made on the basis of the composition of the Schedule A classification with a judgement of its principal content. As a result, there are some SITC codes to which no Schedule A commodity numbers have been assigned. In addition, there are some SITC codes which may be either overcounted or undercounted. In terms of the dollar value of the trade in the three-digit SITC groups, the overcounting or undercounting is not believed to be important. Copies of the above-mentioned correlation lists and the table containing SITC section and group codes and descriptions (but without the value data) may be obtained from the Bureau of the Census.

Some of the commodity descriptions in this report are necessarily abbreviated to save printing costs and, therefore, in many cases, they do not contain all of the qualifying information necessary to define clearly the commodity for which statistics are shown. For complete definition of the individual Schedule A commodity classifications, reference should be made to Schedule A. Reference should also be made to the Standard International Trade Classification, Revised, (United Nations, New York, 1961- Statistical Papers, Series M, No. 34) for additional information regarding these classifications. The omission of a Schedule A commodity classification from this report indicates that no imports of that commodity valued at more than $100 reported on formal entries were reported in the statistics for the given period.

Effective January 1960, the initial reporting of imports on import entries is in terms of the 8-digit commodity classifications contained in United States Import Duties Annotated for Statistical Reporting. This publication presents the statistical reporting requirements as well as the tariff requirements in one volume in arrangement of the tariff paragraphs. The U.S.I.D.A. attempts to minimize the difficulty of cross-classification between the tariff and statistical reporting requirements. The commodity information which is reported on the import entries in terms of U.S.I.D.A. codes is converted into the SITC groups and the Schedule A commodity classifications for presentation in the published import statistics.

Data on SITC Basis for Periods Prior to 1963

With the change in presentation of the Schedule A commodity data in terms of the Standard International Trade Classification, Revised, users may wish to have information for periods prior to 1963 arranged in terms of the SITC, in order to make comparisions between the 1963 statistics and those for earlier periods. For 1962, monthly and annual data in the same basic arrangement as the statistics in this report, i.e.,SITC group by Schedule A commodity number by country, are contained in machine tabulations which are available for use at principal reference locations. In addition, in order to make available as much information on the SITC basis as resources would permit, publications have been prepared containing 1962 monthly and annual value totals in SITC section by SITC group by country of origin arrangement and in country by SITC section by SITC group arrangement. The monthly and annual data are presented in separate publications. These publications also contain correlation lists in Schedule A commodity number by SITC group arrangement and in SITC group by Schedule A commodity number arrangement. The 1962 monthly data in the above-mentioned machine tabulation and in the publication do not include any revisions made subsequent to the release of the original monthly statistics but revisions to these statistics, in SITC group by country and in country by SITC group arrangements, are presented as a supplement in the publication. The 1962 annual data in the machine tabulation and in the publication reflect all revisions published with the 1962 monthly statistics. Additional information regarding these 1962 statistics in SITC arrangement and information concerning the availability of data for prior periods in terms of the SITC classifications may be obtained from the Bureau of the Census.

Estimated Data for Low-Valued Imports

Since January 1958, the data for Schedule A commodity classifications, with the exception of commodity number 9999 500, have excluded information on imports valued under $100 reported on formal immediate consumption entries and imports reported on informal entries (by definition, valued not more than $250). In addition, effective January 1963, the individual commodity classifications exclude data on warehouse withdrawals for consumption valued under $100. It follows that the import statistics for individual commodities are undercounted to the extent that shipments of the commodity are made in lots which are excluded from the commodity statistics under this policy. The total value so excluded amounts to about one percent of the monthly import total. Value estimates based on a one-percent sample of these "low-valued" shipments are shown by country under Schedule A commodity number 9999 500 and are included in the totals for SITC group 990, SITC section 9 and the over-all import total. The estimates are also included in the totals for individual countries as published in Reports FT 950-I and FT 120.[3] Although subject to considerable sam-

[3] See Report No. FT 930-I for handling of the low-value estimates in the import reports by economic class, and Report No. FT 970-I for the handling in the reports by Customs District.

pling variability,[4] particularly where the estimated amounts are relatively small, these estimates may be of some interest as a rough guide to the general magnitude of the effect which the exclusion of the items has on the commodity data for individual countries.

Descriptions of the special handling of the low-valued shipments in effect prior to January 1958 are carried in the publications for those periods. These may be referred to in making comparisons of earlier figures with data for 1958 on. The January 1958 through December 1961 issues of this report contain a discussion of the effect on statistics of the changes made in January 1958 in the handling of low-valued shipments, and a brief summary of the handling in earlier periods.

Classifications for Which Only Quantity Information is Reported

For technical reasons, Schedule A commodity classifications which have been established to provide for the reporting of quantity data only are excluded from all monthly tabulations and publications beginning with the March 1958 data. (These commodity classifications should not be confused with those which provide for the reporting of the dollar value of imports and two units of quantity under the same Schedule A commodity classification number. Both units of quantity for such classifications will continue to be published.) Data for these quantity-only commodity classifications which are excluded from the statistics are compiled as supplementary information which is available from the Bureau of the Census, Washington 25, D.C. It may be necessary to make a small charge for the transcription of this information in the form of a special report for release to interested parties. Reference copies of the supplemental information are available in the New York Office, Economic Operations Division, Bureau of the Census, Room 434, Customhouse, New York, New York.

COUNTRY OF ORIGIN

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. In instances where it is known that the country of origin cannot be determined, the country of shipment is shown and footnoted in this report.

The geographic definitions of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as a part of Schedule A (See "Commodity Information" above). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each Schedule A commodity number, separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail and identified as "OTH CTY" (other countries).[5] Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS TO PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies available for reference at public libraries). A Catalog of United States Foreign Trade Statistical Publications is also available. Supplementary information and explanations of interest to users of foreign trade statistics (such as announcements of changes in types of shipments covered by current statistics, unusual shipments, problems of valuation and classification, changes in statistical procedures, etc.) which were formerly included in a separate publication, Foreign Trade Statistics Notes, are now being included in current issues of this re-

[4] The estimated total for low-value imports reported under Schedule A commodity number 9999 500 is subject to a sampling variability of 3 to 4 percent. This means that the chances are 2 out of 3 that a complete tabulation would have resulted in a figure that differed from the estimate by no more than 3 to 4 percent. The estimates by country under commodity number 9999 500 are subject to greater sampling variability - around 10 percent for countries with about 200 low-valued shipments in the sample; around 20 percent for countries with about 75 shipments in the sample; and over 20 percent for smaller sample sizes. For more detailed indications of the effect of sampling on the estimates for low-valued imports by country see the "Explanation" in front of Report No. FT 120, U.S. Imports of Merchandise for Consumption, Country of Origin by SITC Commodity Group.

[5] For commodities for which quantity is reported in two different units, complete country of origin information is shown for the quantity in terms of the second unit, even though the corresponding value for some countries may be less than $10,000.

port and other statistical publications, or in special announcements accompanying the regular publications. Copies of such announcements are also attached to reference copies of tabulations, where appropriate. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost of a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

ABBREVIATIONS FOR UNITS OF QUANTITY

[When quantity is reported in two units for a commodity the second quantity is shown separately, without value, under the same commodity number and immediately following the data for the first unit of quantity (e.g., "Cattle" and "Manganese ore," Schedule A commodity numbers 0010 600-0010 900 and 6211 000-6211 300, respectively)]

Abbrev.	Description	Abbrev.	Description	Abbrev.	Description
AOZ	Advoirdupois Ounce	GBX	Gross Boxes	NO	Number

Boocks, Acting Chief, Machinery and Vehicles Branch.

United States import statistics are compiled from information verified by Customs Examiners on import entries filed with Customs by importers. Under the direction of Philip Nichols, Jr., Commissioner of Customs, and David B. Strubinger, Assistant Commissioner of Customs, the primary responsibility for the verification of import statistical information is assigned to the field and headquarters staff of the Division of Appraisement Administration.

U. S. Bureau of the Census United States Import Statistics, Report FT 110, September 1963, Washington, D.C. January 1964.

For sale by the Superintendent of Documents, U. S. Government Printing Office, Washington, D.C. 20402 and Department of Commerce Field Offices. Price 40 cents (single copy). Subscription price: $4; $1.25 additional for foreign mailing.

ANNOUNCEMENTS AND SPECIAL NOTICES

IMPORT STATISTICS FOR SEPTEMBER 1963

The September 1963 data are the first month's data compiled in terms of the new Tariff Schedules of the United States Annotated. While every effort has been made to effect an orderly transition in classification systems from the Schedule A (Statistical Classification of Commodities Imported Into the United States) detail in August 1963, to the TSUSA detail in September 1963, it is possible, because of the magnitude of the task, that a certain number of inaccuracies were not detected and are reflected in the accompanying data. At the time of release of these statistics some of these inaccuracies were noted but were not believed to be of the type as to impair the usefulness of the data. These inaccuracies were primarily of the type dealing with completeness of descriptions of the product. However, some errors were also noted in which quantity information, where required, was not shown for a commodity or for a particular commodity-country cell. Every attempt will be made to correct these types of errors so they will not recur in the October statistics. In the meantime, users of the statistics are requested to refer to the TSUSA when interpreting the data reflected in this publication and to call to the attention of the Foreign Trade Division any discrepancies which they may note.

YARN NUMBER RECODES FOR CERTAIN COTTON YARN AND WOVEN FABRICS

In TSUSA, certain cotton yarns are reported under 7-digit reporting numbers which begin with digits 301 and 302, and certain woven cotton fabrics are reported under 7-digit reporting numbers which begin with digits 320-331. For cotton yarn, the fourth and fifth digit of the reporting number represent the yarn number. For fabrics, the fourth and fifth digits represent the average yarn number of the fabric. In TSUSA, these fourth and fifth digits range from 00 to 98. In the published statistics, the fifth digit of the reporting numbers for the above yarns and fabrics has been changed to "0", thereby reducing the number of 7-digit classifications published for these commodities as compared to the potential number of 7-digit classifications that may be required to be reported for duty purposes. For example, reporting numbers 301.1000 through 301.1900 (unbleached cotton yarn of numbers 10 through 19) appear as 301.1000 in the published statistics, and reporting numbers 320.3092 through 320.3992 (unbleached cotton fabrics, not fancy or figured, of average yarn numbers 30 through 39) appear as 320.3092 in the published statistics.

STATISTICAL CLASSIFICATION OF WATCHES AND CLOCKS REPORTED UNDER TSUSA NUMBERS 715.0500 AND 715.1500 (SITC GROUP 864)

In the reporting of watches (TSUSA number 715.0500), and clocks with movements measuring less than 1.77 inches in width (TSUSA number 715.1500) three or more reporting numbers are required. In addition to TSUSA numbers 715.0500 and 715.1500, the movements and cases comprising the complete articles are also reported under the appropriate 7-digit reporting numbers which would have been applicable to the movements and cases if separately imported.

In order to provide data for complete watches and clocks by type of case and movement, the last two digits of reporting numbers 715.0500 and 715.1500 are recoded in terms of the following tables before inclusion in the published statistics. The codes shown in the tables are the applicable 6th and 7th digits for articles reported under TSUSA numbers 715.0500 and 715.1500 (SITC group 864).

Note: The separately reported movements in cases and cases containing movements are not shown in this report since the quantities and values are included in the totals shown for complete watches and clocks.

STATISTICAL CLASSIFICATION OF WATCHES, TSUSA NUMBER 715.05--

Commodity description	Unit of quantity	Applicable 6th and 7th digits (statistical suffix) for watches provided for in item 715.05 by type of case and movement		
		With cases wholly or almost wholly of gold or platinum or of both gold and platinum (provided for in item 720.20)	With cases wholly or in part of silver; or containing gold or platinum; or set etc. with stones, etc. (provided for in item 720.24)	With other cases (provided for in item 720.28)
Watches				
With watch movements containing not over 17 jewels:				
Not adjusted or "self-winding" (provided for in items 716.10 - 716.36 or 932.10 - 932.36):				
Having -				
Not over 1 jewel	No.	01	02	03
Over 1, not over 7 jewels	No.	05	06	07
Over 7, not over 15 jewels	No.	11	12	13
Over 15, not over 17 jewels	No.	15	16	17
Adjusted, not "self-winding" (provided for in items 717.10 - 717.36 or 933.10 - 933.36):				
Having -				
Not over 1 jewel	No.	21	22	23
Over 1, not over 7 jewels	No.	25	26	27
Over 7, not over 15 jewels	No.	31	32	33
Over 15, not over 17 jewels	No.	35	36	37
"Self-winding," not adjusted (provided for in items 718.10 - 718.36 or 934.10 - 934.36):				
Having -				
Not over 1 jewel	No.	41	42	43
Over 1, not over 7 jewels	No.	45	46	47
Over 7, not over 15 jewels	No.	51	52	53
Over 15, not over 17 jewels	No.	55	56	57
Adjusted and "self-winding" (provided for in items 719.10 - 719.36 or 935.10 - 935.36):				
Having -				
Not over 1 jewel	No.	61	62	63
Over 1, not over 7 jewels	No.	65	66	67
Over 7, not over 15 jewels	No.	71	72	73
Over 15, not over 17 jewels	No.	75	76	77
With watch movements containing over 17 jewels (provided for in item 716.08)	No.	81	82	83
With other movements (provided for in various item numbers)	No.	91	92	93

STATISTICAL CLASSIFICATION OF CLOCKS WITH MOVEMENTS MEASURING LESS THAN 1.77 INCHES IN WIDTH, TSUSA NUMBER 715.15--

Commodity description	Unit of quantity	Applicable 6th and 7th digits (statistical suffix) for clocks provided for in item 715.15 by type of case and movement			
		With outer cases for travel clocks (provided for in item 720.33)		With cases for other clocks	
		With inner cases over 50% of metal by weight and wholly or in part of precious metal (provided for in item 720.32)	With other inner cases (provided for in item 720.34)	Over 50% of metal by weight and wholly or in part of precious metal (provided for in item 720.32)	Other (provided for in item 720.34)
Clocks with movements measuring less than 1.77 inches in width					
With clock movements:					
Not constructed or designed to operate for over 47 hours without rewinding:					
Not having over one jewel (provided for in item 720.02):					
Electric:					
Battery-operated	No.	01	02	04	05
Other	No.	07	08	10	11
Other (non-electric)	No.	13	14	16	17
Having over one jewel (provided for in item 720.04):					
Electric:					
Battery-operated	No.	21	22	24	25
Other	No.	27	28	30	31
Other (non-electric)	No.	33	34	36	37
Constructed or designed to operate for over 47 hours without rewinding:					
Not having over one jewel (provided for in item 720.06)	No.	53	54	56	57
Having over one jewel (provided for in item 720.08)	No.	73	74	76	77
With other (watch) movements	No.	91	92	94	95

REVISIONS IN TSUSA COMMODITY NUMBERS EFFECTIVE SEPTEMBER 1963

Attention is called to the following changes in statistical classification numbers and/or units of quantity, made effective with the statistics for September 1963, which are not reflected in Tariff Schedules of the United States Annotated (TSUSA) or in the first Supplement thereto. These changes will appear in a future Supplement to TSUSA.

1. Statistical classification numbers, descriptions, and units of quantity indicated below replaced those in TSUSA for items 716.3020 through 716.3640 (SITC group 864)—

Item	Stat. suffix	Articles	Unit of quantity
		Watch movements, assembled, etc. (con.):	
		Having no jewels, etc. (con.):	
		Not adjusted, etc. (con.):	
		Having over 7 but not over 17 jewels:	
716.30	**	Not over 0.6 inch in width	No.
716.31	**	Over 0.6 but not over 0.8 inch in width	No.
716.32	**	Over 0.8 but not over 0.9 inch in width	No.
716.33	**	Over 0.9 but not over 1 inch in width	No.
716.34	**	Over 1 but not over 1.2 inches in width	No.
716.35	**	Over 1.2 but not over 1.5 inches in width	No.
716.36	**	Over 1.5 but not over 1.77 inches in width	No.

**For movements containing—	The statistical suffix is--
8 jewels	08
9 jewels	09
10 jewels	10
11 jewels	11
12 jewels	12
13 jewels	13
14 jewels	14
15 jewels	15
16 jewels	16
17 jewels	17

2. Changes indicated below were made in units of quantity only—

Item	Stat. suffix	Unit of quantity	
		Reads	Should read
494.50	00 (SITC group 515)	Mg.	Mc.
727.80	60 (SITC group 821)	Lb.	X
	80 (SITC group 821)	Lb.	X
728.25	00 (SITC group 627)	Sq. yd.	X

AVAILABILITY OF 1961 ANNUAL IMPORT STATISTICS PRESENTED IN TERMS OF TARIFF SCHEDULES OF THE UNITED STATES

A special publication, Dollar Value of U.S. Imports of Merchandise for Consumption, TSUS Schedule by Part by Item, 1961, has been prepared. The 1961 TSUS (Tariff Schedules of the United States) value totals presented in this publication are a recompilation of data originally compiled in terms of classifications presented in Schedule A (Statistical Classification of Commodities Imported Into the United States). The recompilation is based on preliminary allocations of 1961 United States import trade data in terms of the classifications in TSUS, as furnished by the Tariff Commission. An index, based on a conversion supplied by the Tariff Commission, in TSUS by 1961 Schedule A commodity number arrangement and also in 1961 Schedule A by TSUS number arrangement is included in the publication. Sales copies of this report are available at the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402, and Department of Commerce Field Offices at 75 cents per copy.

CORRELATION BETWEEN TSUSA COMMODITY NUMBERS AND SITC REVISED CLASSIFICATION NUMBERS

In accordance with an announcement made in the July 1963 issue of Report FT 110, United States Imports of Merchandise for Consumption, Commodity by Country of Origin, the data in this publication are being presented in terms of the commodity classifications in the Tariff Schedules of the United States Annotated (TSUSA) within each of the 177 three-digit commodity groups of the United Nations Standard International Trade Classification (SITC). The arrangement of commodity data in terms of three-digit SITC commodity group by TSUSA number will pertain also to subsequent issues of this publication. Reference listings showing the SITC group code assigned to each TSUSA number and the TSUSA numbers included within each SITC group, as developed by the Tariff Commission, are presented beginning on page V of this report.

CORRELATION BETWEEN THE TARIFF SCHEDULES OF THE UNITED STATES ANNOTATED (TSUSA) NUMBERS AND THE STANDARD INTERNATIONAL TRADE CLASSIFICATION (SITC) REVISED GROUP NUMBERS

(As of August 31, 1963)

GENERAL EXPLANATION

COVERAGE

Types of Shipments Included

The import statistics include government as well as non-government shipments of merchandise from foreign countries to the United States. However, American goods returned by the United States armed forces for their own use are excluded. Shipments between the United States, its outlying possessions and Puerto Rico are not reported as United States imports, but imports into Puerto Rico from foreign countries are considered to be United States imports and are included in this report. Merchandise shipped under Customs custody through the United States in transit from one foreign country to another is not reported as imports. In general, the import statistics are a complete record of the physical movement of merchandise into the United States from foreign countries (except for intransit shipments), but there are some exclusions of items of relatively small importance in terms of total value, such as personal and household effects.

Imports for consumption shown in this report consist of merchandise entered into United States consumption channels, i.e., merchandise released from Customs custody immediately upon arrival, merchandise entered into bonded manufacturing warehouses (other than smelting and refining warehouses), merchandise withdrawn from bonded storage warehouses for release into domestic consumption channels, and imported ores and crude metals which have been processed in bonded smelting warehouses.

Monthly Coverage

It is the objective of the compiling procedures, insofar as practical, to include shipments in the imports for consumption statistics for the month of import which, in general, is based on the date of filing of the consumption entry or warehouse withdrawal document.[1] However, because of processing problems, there has always been a carry-over of a small percentage of items from the proper month to a subsequent month (usually the month immediately following). The amount of this carry-over was increased a few years ago in order to take advantage of early release dates made possible with the use of electronic equipment.

RELATED INFORMATION

Information is also compiled for general imports, which represent total arrivals of imported goods (except for intransit shipments), i.e., merchandise released from Customs custody immediately upon arrival plus merchandise entered into bonded storage warehouses, bonded manufacturing warehouses, and bonded smelting and refining warehouses immediately upon arrival. General import figures covering total trade, country totals and Customs district totals are published monthly. General import commodity statistics are not published but are available for reference purposes.

Trade between the United States, Puerto Rico and United States possessions (not included as United States imports) is presented separately in Report No. FT 800. Statistics on the movement of intransit merchandise arriving at or leaving the United States by vessel (not included in this report) are also compiled and presented in summary form in Report No. FT 985. In addition, transportation statistics (showing shipping weight as well as value information) are compiled covering that part of general imports of merchandise which arrives by vessel. Summary vessel transportation statistics for both imports and exports are presented in Report No. FT 985. Effective with statistics for January 1962, information is being compiled on United States general imports of merchandise by air. These data are published in Reports FT 380, FT 390 and FT 986. A more complete description of the coverage and presentation of the various types of statistics mentioned above will be found in the introductions to the specified reports.

SOURCE OF INFORMATION

The source of information for all of the imports included in this report is the import entry and warehouse withdrawal forms which importers are required to file with Collectors of Customs. Effective January 1, 1962, statistical factors of country of origin, net quantity, value, and commodity classification are verified or corrected as necessary by Customs examiners on all formal consumption and warehouse entries.[2] This verification of statistical data is made at the time the examiner reviews invoices and samples of merchandise for duty and other Customs purposes, and the statistical copy of the entry is corrected by the examiner at that time if he finds that it does not accurately reflect the information called for by the statistical requirements. Information on warehouse withdrawals, which account for approximately 10 percent of the total value of imports for consumption, while not subject to the examiner verification procedure directly, should be improved indirectly (due to "education" of importers/brokers) by the verification of the warehouse entries to which they correspond.

VALUATION

The dollar value shown in the import statistics is defined generally as the market value in the foreign country, excluding the United States import duties, ocean freight and marine insurance.

COMMODITY INFORMATION

Commodity Classification

Effective with the statistics for September 1963, import commodity information is compiled in accordance with the classifications in Tariff Schedules of the United States Annotated (TSUSA), an official publication of the United States Tariff Commission embracing the legal text of the Tariff Schedules of the United States together with statistical annotations. TSUSA replaces Schedule A, Statistical Classification of Commodities Imported into the United

[1] For shipments by vessel, merchandise is not included in the statistics prior to the date of formal entrance of the vessel (i.e., the date of the inward Customs manifest for the vessel).

[2] For information on the effects of examiner verification, see the article entitled "Level of Accuracy in Import Statistics" in the October 1961 issue of this report.

States, which was previously used for reporting statistical data in import reports and tabulations. TSUSA also replaces United States Import Duties Annotated for Statistical Reporting (USIDA), the basic manual previously used in the initial reporting of commodity information on import entry and withdrawal forms.

The TSUSA classifications are arranged in this report in the order of the Standard International Trade Classification, Revised. The data are presented in SITC section by SITC group by TSUSA number by country of origin arrangement. The table entitled "Imports of Merchandise For Consumption By SITC Section By SITC Group" shows the SITC section and group codes and their complete descriptions. The assignment of SITC group codes to the Tariff classifications was originally made by the Tariff Commission. In some instances where a Tariff classification contains commodities which are classified in two or more SITC groups, the Tariff classification was assigned to the SITC group believed to account for the greatest proportion of imports. Correlation lists which show the SITC group code assigned to each TSUSA number and the TSUSA numbers included in each SITC group are included in the September 1963 issue of this report. Copies of these correlation lists may be obtained from the Bureau of the Census, upon request.

Some of the commodity descriptions in this report are necessarily abbreviated to save printing costs and, therefore, in many cases they do not contain all of the qualifying information necessary to clearly define the commodity for which statistics are shown. For complete description of the individual TSUSA classifications, reference should be made to Tariff Schedules of the United States Annotated (1963), Tariff Commission Publication 103, available at the office of the Superintendent of Documents, Government Printing Office, Washington, D.C. 20402, at offices of local Collectors of Customs, and Department of Commerce Field Offices. Reference should also be made to the Standard International Trade Classification, Revised (United Nations, New York, 1961--Statistical Papers, Series M, No. 34) for additional information regarding these classifications.

TSUS Data Being Prepared for Prior Periods

In order to provide some information for use in making comparisons between the statistics compiled in accordance with TSUSA and those for periods prior to the introduction of TSUSA, special publications containing data in terms of the Tariff Schedules of the United States (TSUS) are being prepared. TSUS classifications are the 5-digit Tariff items from which the 7-digit TSUSA classifications are formed by combining the 5-digit item number with a 2-digit statistical suffix. More detailed information regarding these special publications is presented in special notices included in the various monthly issues of this report.

Estimated Data for Low-Valued Imports

From January 1958 through August 1963, the data for Schedule A commodity classifications, with the exception of commodity number 9999 500, have excluded information on imports valued under $100 reported on formal immediate consumption entries and imports reported on informal entries (by definition, valued not more than $250). In addition, effective January 1963, the individual commodity classifications exclude data on warehouse withdrawals for consumption valued under $100. In compiling the statistics for September 1963 and subsequent periods, these procedures for the exclusion of low-valued imports from the individual commodity classifications will continue to be in effect. It follows that the import statistics for individual commodities are undercounted to the extent that shipments of the commodity are made in lots which are excluded from the commodity statistics under this policy. The total value so excluded amounts to about one percent of the monthly import total. Value estimates based on a one-percent sample of these "low-valued" shipments are shown by country under TSUSA number 999.9500 and are included in the totals for SITC group 990, SITC section 9 and the over-all import total. The estimates are also included in the totals for individual countries as published in Reports FT 950-I and FT 120.[3] Although subject to considerable sampling variability,[4] particularly where the estimated amounts are relatively small, these estimates may be of some interest as a rough guide to the general magnitude of the effects which the exclusion of the items has on the commodity data for individual countries.

Descriptions of the special handling of the low-valued shipments in effect prior to January 1958 are carried in the publications for those periods. These may be referred to in making comparisons of earlier figures with data for 1958 and subsequent periods. The January 1958 through December 1961 issues of this report contain a discussion of the effect on statistics of the changes made in January 1958 in the handling of low-valued shipments, and a brief summary of the handling in earlier periods.

Classifications for Which Only Quantity Information Is Reported

For technical reasons, TSUSA numbers which have been established to provide for the reporting of quantity data only are excluded from all monthly tabulations and publications. (These commodity classifications should not be confused with those which provide for the reporting of the dollar value of imports and two units of quantity under the same TSUSA number. Both units of quantity for such classifications will continue to be published.) Data for these quantity-only commodity classifications which are excluded

---

[3] See Report No. FT 930-I for handling of the low-value estimates in the import reports by economic class, and Report No. FT 970-I for the handling in the reports by Customs District.

[4] The estimated total for low-valued imports reported under TSUSA number 999.9500 is subject to a sampling variability of 3 to 4 percent. This means that the chances are 2 out of 3 that a complete tabulation would have resulted in a figure that differed from the estimate by no more than 3 to 4 percent. The estimates by country under commodity number 999.9500 are subject to greater sampling variability - around 10 percent for countries with about 200 low-valued shipments in the sample; around 20 percent for countries with about 75 shipments in the sample; and over 20 percent for smaller sample sizes. For more detailed indications of the effect of sampling on the estimates for low-valued imports by country see the "Explanation" in front of Report No. FT 120, U.S. Imports of Merchandise for Consumption, Country of Origin by SITC Commodity Group.

from the statistics are compiled as supplementary information which is available from the Bureau of the Census, Washington, D.C. 20233. It may be necessary to make a small charge for the transcription of this information in the form of a special report for release to interested parties. Reference copies of the supplemental information are available in the New York Office, Economic Operations Division, Bureau of the Census, Room 434, Customhouse, New York, New York.

COUNTRY OF ORIGIN

The country reported in the statistics as the country of origin is defined as the country where the merchandise was grown, mined, or manufactured. In instances where it is known that the country of origin cannot be determined, the country of shipment is shown and footnoted in this report.

The geographic definitions of countries reported are shown in Schedule C, Classification of Country Designations Used in Compiling the United States Foreign Trade Statistics. Country names which are abbreviated in this report to save space are shown in full in Schedule C, together with descriptions of the countries, adjacent provinces, territories, islands, or other areas considered a part of the country for statistical purposes. Schedule C is published as Annex B in TSUSA (See "Commodity Information" above). A separate edition of Schedule C is also available free upon request to the Bureau of the Census.

To save printing costs complete commodity by country of origin information is not shown in the monthly issues of this report. For each TSUSA number, separate country of origin information is shown only for countries from which imports during the period covered by the report were $10,000 or more. Imports of that commodity originating in countries from which the amount shipped was less than $10,000 are presented as a combined total without country of origin detail and identified as "OTH CTY" (other countries).[5] Information on imports originating in countries from which the amount shipped was less than $10,000 can be supplied upon request. A charge may be made to cover the cost of preparing this detailed information.

Countries are listed for each commodity in this report according to continents, in sequence within each continent from north to south and west to east, in accordance with Schedule C. The omission of a country name under a commodity classification indicates no imports of that commodity from that country or imports of less than $10,000.

REVISIONS IN PREVIOUS MONTHS' REPORTS

Significant revisions to data published in this report for earlier months of the current and previous year are shown periodically at the back of this report. With the exception of very important changes, any revisions to data for earlier years are held for reflection in the figures to be published in Foreign Commerce and Navigation of the United States for that year.

SOURCES OF FURTHER INFORMATION ABOUT IMPORT STATISTICS

A complete discussion of the compilation procedures and coverage for import statistics will be found in the Foreword to the latest edition of Foreign Commerce and Navigation of the United States. (Copies available for reference at public libraries). A Catalog of United States Foreign Trade Statistical Publications is also available. Supplementary information and explanations of interest to users of foreign trade statistics (such as announcements of changes in types of shipments covered by current statistics, unusual shipments, problems of valuation and classification, changes in statistical procedures, etc.) which were formerly included in a separate publication, Foreign Trade Statistics Notes, are now being included as special announcements in current issues of this report and other statistical publications. Copies of such announcements are also attached to reference copies of tabulations, where appropriate. Data in this report are available for reference purposes prior to the publication of the report or may be obtained in advance of publication on payment of the cost of a special report. Reports providing additional detail compiled but not published can be obtained on a cost basis. For free copies of the catalog or for further information regarding reference copies of tabulations or the availability of special reports, request should be made to the Bureau of the Census.

---

[5] For commodities for which quantity is reported in two different units, complete country of origin information is shown for the quantity in terms of the second unit, even though the corresponding value for some countries may be less than $10,000.

[1]See SITC group 001; reported separately prior to September 1963.

[2]The SITC 3-digit description used here has been modified somewhat from that published in the United Nations' publication (Statistical Papers Series M No. 34). This modification does not change the content of the United Nations' class.

[3]Certain uranium bearing material, formerly classified under SITC group 286, is included in SITC group 515 effective with September 1963 statistics.

[4]Not included in merchandise statistics.

[5]Not classified separately in import statistics.

[6]Included in SITC group 003 prior to September 1963.

[7]See SITC group 896; reported separately prior to September 1963.
